

OVERVIEW

The GX02 is a patented 2 x 4 lighting troffer with a UV-C air treatment system. The GX02 uses energy efficient LEDs to provide high efficiency area illumination.

The GX02 draws in untreated air, pushes it through a highly reflective UV chamber with an ultraviolet light set at the wavelength of 253.7 nanometers which inactivates bacteria or fungi that passes over the lamp. Four fans continue to push the air through the unit at approximately 50 cfm. This allows the unit to treat the equivalent of one full volume of air from a typical 10 x 10 room with 8 ft. ceilings four times an hour. The system works 24/7/365.
